Bachelors of Software Engineering

Multimedia University of Kenya

2020 - Ongoing

The frontend developer career path

Scrimba.com

Dec 2020 - April 2021

Learnt HTML , CSS , JavaScript and React Js

PROJECTS

Sosyfy— [*Github*] [*Demo*]

My personal portfolio website is built with react js .

- Translated figma mockup into clean and reusable React ui components.
- Implemented a fully working form and custom hooks.
- Used routing and animation libraries.

Tesla clone— [*Github*] [*Demo*]

Tesla's landing page cloned in react js .

- Recreated the landing page fully responsive.
- Added routing and conditional rendering of components.
- Re-used components and state management.

Cara — [*Github*] [*Demo*]

An ecommerce site built with html css and javascript

- Implemented routing in javascript.
- Used javascript libraries such as Aos and swiper js .

Furn— [*Github*] [*Demo*]

An ecommerce furniture website landing page.

- The website displays various products being sold .
- I used HTML , SASS and Javascript to build it .

Crybaby — [*Github*]

A cryptocurrency search and tracking market prices website

- The website uses an api to track cryptocurrencies market price changes.
- I used redux store , styled components axios and react to build it .
